most reasonable prices*

Kelly Bros. Nurseries

DANVILLE, N. Y.

Catalog

1937

IMPORTANT INFORMATION

ORDER EARLY—As soon as this Catalog reaches you send in your complete order with definite shipping instructions. We will then set the trees aside for you awaiting the desired shipping time. If you prefer you can leave the time of shipment to us and we will ship so as to reach you at the best time for planting in your locality.

USE ORDER SHEET—Please make your order out on order sheet enclosed. To avoid mistakes and delay write letters on a separate sheet of paper.

SEND CASH WITH ORDER—Please do not ask us for credit. It is our cash with order—direct from nursery to planter—method of doing business that enables us to sell trees of the highest quality at such extremely low prices. Remittances should be made by post office or express money order, bank draft or registered letter. To large buyers, when satisfactory reference is given, we will ship C. O. D. provided one-fourth the amount of order is sent in cash when order is placed.

BOXING AND PACKING FREE—We make no charge for boxing or packing. Prices are f. o. b. cars at Dansville.

QUANTITY RATES—Less than ten trees of a variety at each rates. We allow hundred rates on fifty or more trees, provided your order does not call for less than ten trees of any one variety.

PLANTING SEASON—Trees can be planted any time during their dormant period. We ship all Winter to Southern states, but our regular Spring shipping season opens about the first of March and continues well into June. Fall planting season begins about Oct. 15th and extends until ground freezes solid.

SATISFACTION GUARANTEED—We guarantee every tree or bush to be up to grade specified or better. We also guarantee arrival to customer in first class condition. If through delay or mishandling in transit, trees or bushes are not in first class condition on arrival, and customers will notify us immediately, we will make prompt and satisfactory adjustment.

HOW TREES ARE GRADED—Our trees are graded in accordance with the Grading Table of the Horticultural Standards of the American Association of Nurserymen. Fruit trees are graded by age and caliper. Caliper taken 2 inches above the collar or bud. When height is given it represents the average height of the grade under normal conditions.

See illustration on opposite page.

TO OUR CUSTOMERS

We wish to express our appreciation for the orders that you have sent us in the past. We have tried to send you only trees of the highest quality of the size or grade ordered, trees that were properly grown and well cared for—carefully packed to insure arrival in good condition. We have never considered any transaction completed unless our customers were well satisfied.

Thousands of successful commercial orchardists throughout the country will testify as to the vigor and vitality of our trees. If you want to know what our trees will do for you, ask any of Kelly's customers.

There seems to be about the same supply of fruit trees throughout the country this year as there was a year ago, but the demand is very much better. We advise placing your order as early as possible. If you wish a special date of shipment, kindly designate this on your order, otherwise we will make shipment so as to reach you at the most desirable time for planting in your section.

Thanking you again for your patronage, we are
KELLY BROTHERS NURSERIES.

What Varieties to Plant

While we will be very pleased to assist you in the selection of the proper varieties to plant for your section, and to advise you on the planting and care of your trees, your State maintains a State Experiment Station which is in our opinion, better qualified to advise you on this subject than anyone else. These various State Experiment Stations are operated by a thoroughly trained and highly efficient staff of men who have made a special study of fruit growing and agriculture in general, and they will be glad to give you the benefit of their expert advise. Do not hesitate to write them. Most of the State Experiment Stations publish instructive and helpful booklets on the various phases of agriculture which they are pleased to send to any applicant. We suggest that you write your State Experiment Station for a list of the booklets that they have available. Just address your letter to "Agricultural Experiment Station," naming the city or town where the Station is located, as shown in the list below. Do not hesitate to write them. They will be more than glad to assist you.

Distances for Planting

Standard Apples.....	40	ft. x 40	ft.
Standard Pears, Apricots.....	25	ft. x 25	ft.
Sweet Cherries.....	30	ft. x 30	ft.
Sour Cherries, Plums, Peaches.....	20	ft. x 20	ft.
Quinces, Dwarf Apples, Dwarf Pears.....	15	ft. x 15	ft.
Grapes.....	10	ft. x 10	ft.
Currants and Gooseberries.....	6	ft. x 6	ft.
Red and Purple			
Raspberries.....	3	ft. x 7 ft. or 5	ft. x 5 ft.
Black Raspberries.....	3½	ft. x 8 ft. or 5	ft. x 6 ft.
Blackberries.....	4	ft. x 8 ft. or 7	ft. x 7 ft.
Strawberries.....	3½	ft. x 1½	ft.
Asparagus.....	5	ft. x 2	ft.

NUMBER OF TREES OR PLANTS PER ACRE

40 ft. x 40 ft.....	27	5 ft. x 5 ft.....	1745
30 ft. x 30 ft.....	48	5 ft. x 6 ft.....	1452
25 ft. x 25 ft.....	69	3 ft. x 7 ft.....	2074
20 ft. x 20 ft.....	108	3½ ft. x 8 ft.....	1556
15 ft. x 15 ft.....	193	4 ft. x 8 ft.....	1361
10 ft. x 10 ft.....	435	3½ ft. x 1½ ft....	8297
7 ft. x 7 ft.....	888	5 ft. x 2 ft.....	4356
6 ft. x 6 ft.....	1210		

IMPORTANT—To find the number of trees required to plant a plot of land of any given size, first determine the size of the plot of land in square feet. Then multiply the distance between the rows by the distance between the trees in each row. This will give you the distance between the trees in square feet. Divide the number of square feet in the plot of land by the distance in square feet between the trees, and the result will be the number of trees required to plant the plot of land at the distances that you have selected. Or if you want to determine the number of trees required to plant an acre at any given distance apart, divide the number of square feet in an acre (43560) by the distance apart in square feet and the result will be the number of trees required **per acre** at the distances apart that you have selected.

Example—Size of plot of land 100 ft. x 200 ft. = 20,000 sq. ft.
Planting distance 50 ft. x 20 ft. = 1,000 sq. ft.
Divide 20,000 sq. ft. by 1000 sq. ft. = 20 trees.

Special Grade, Extra Large One Year McIntosh

The above illustration shows our Mr. William F. Kelly beside a bundle of our Special Grade One Year McIntosh apple trees. These are the finest one year McIntosh that we have ever seen. They are extra large, 5 to 6 foot trees, about $\frac{11}{16}$ in. caliper, with nice clean straight bodies, well branched tops and an abundance of healthy fibrous roots. We offer this Special Grade—Extra Large, 5 to 6 ft., One Year McIntosh at 75 cents each, \$6.00 per 10, \$50.00 per 100. Certified McIntosh of this grade 5 cents per tree extra.

We also have a few hundred Red Rome of this special grade at the above prices and some Stayman's Winesap at 5 cents per tree less than above prices.

What Others Say About Our Trees

North East, Pa., April 17, 1936.

Gentlemen: We received your trees in splendid condition. They are wonderful. My only regret is that I have not purchased all my trees from Kelly Brothers. In the future you shall have all of my business.

Yours very truly, William P. Sengel.

Jamestown, N. Y., May 1, 1936.

Gentlemen: The apple trees that we recently received appear to be about as nice a block of fruit trees as we have ever received from anyone. We hope they will grow as nice as they look.

Yours very truly, Anderson Brothers.

Stapleton, S. I. N. Y., May 22, 1936.

Gentlemen: The fruit trees and other nursery stock that you shipped to me last year are certainly of the very highest quality. I did not lose a single tree, although the past Winter was an exceptionally severe one. Your stock proved vigorous enough to withstand the severe weather.

Sincerely yours, Herbert Klumpe.

Reading, Pa., May 29, 1936.

Gentlemen: Shipment of trees arrived, and I take this opportunity to thank you for the superb stock that you sent. It is far beyond expectation. I shall recommend your concern to all interested in trees.

Respectfully yours, A. S. Ibach.

Waterville, Me., May 1, 1936.

Gentlemen: I bought trees in the past from three other companies, but have never received trees like those that you sent me seven or eight years ago. They are wonderful trees, and today are far and away better than those received from any of the other companies. Picked 200 bushel of apples from them this fall.

Yours very truly, John N. Manter.

West Paris, Me., March 22, 1936.

Gentlemen: It may please you to know that from 150 McIntosh ordered from you in 1929, I picked last Fall 167 bushel of fancy McIntosh.

Yours very truly, J. H. McKeen.

Wolcott, N. Y., February 4, 1936.

Gentlemen: Seventy-two of your McIntosh and Greening apple trees set three years ago averaged nearly one-half bushel per tree this year.

Yours truly, Maurice Seelye.

We have for over 50 years specialized in the growing of high quality fruit trees for the commercial orchard planting trade. We serve thousands of customers every year, and you will find orchards planted with Kelly's trees in almost every section of the country. If you desire to find out how Kelly's trees will grow in your section, drop us a line and we can undoubtedly supply you the name of some fruit grower who has an orchard of Kelly's trees growing in your section. We will be glad to have you visit the orchards of any of Kelly's customers to find out just what you can expect from any trees that you may purchase of us.

Kelly's Inspected Apple Trees

Dr. J. K. Shaw of the Mass. Agricultural Experiment Station, a recognized authority on fruit tree varieties, has again inspected our Apple trees for trueness to name. We have on file in our office a statement issued by him that to the best of his knowledge all the salable Apple trees in Kelly Bros. Nurseries are true to name.

PRICES OF INSPECTED APPLE TREES

			Each	Ten	Hundred
2 Year	5 to 7 ft.	$\frac{3}{4}$ and up	\$.75	\$6.00	\$50.00
2 Year	4 to 5 ft.	$\frac{5}{8}$ to $\frac{3}{4}$.65	5.00	40.00
2 Year	3 to 4 ft.	$\frac{1}{2}$ to $\frac{5}{8}$.55	4.00	30.00
1 Year	3 to 5 ft.	Sturdy Buds	.65	5.00	40.00

Kelly's Certified Apple Trees

In addition to inspecting for trueness to name all of Kelly Brothers Apple Trees, Dr. Shaw has attached to some trees of each of the leading commercial varieties the Official Certification Tag of the Mass. Fruit Growers' Association. This tag bears on its face the name of the variety of fruit the tree is certified to bear and on the reverse side the official stamp of the Mass. Fruit Growers' Association. Owing to the cost of attaching Certification Tags we are obliged to make a slight additional charge for trees with Certification Tags attached.

WE CAN FURNISH THE FOLLOWING VARIETIES WITH OFFICIAL CERTIFICATION TAGS ATTACHED:

Baldwin
Cortland
Delicious

Early McIntosh Apple

ABSOLUTELY DEPENDABLE TREES

SUMMER VARIETIES

- EARLY McINTOSH**—A handsome new early red apple of exceptionally fine flavor and high quality. Trees are vigorous, hardy, healthy, productive and bear annually. Ripens in August.
- EARLY HARVEST**—Large pale yellow apple of fine flavor. Good bearer. August.
- GOLDEN SWEET**—Large, pale yellow, very sweet. August.
- RED ASTRACHAN**—Handsome deep crimson apple, excellent for cooking. Hardy and a good bearer. August.
- SWEET BOUGH**—Large, pale yellow, sweet. August.
- YELLOW TRANSPARENT**—The best early yellow apple. Excellent flavor. Trees hardy and abundant bearers. August.

AUTUMN VARIETIES

- DUCHESS OF OLDENBURG**—Large red striped apple of good flavor. Very hardy. September.
- FALL PIPPIN**—Very large, yellow and juicy. Excellent for cooking. Hardy and productive. October to December.
- FAMEUSE (Snow Apple)**—Medium size, crimson with snow white flesh. Excellent quality. November.
- GRAVENSTEIN**—Large, handsome, red streaked apple of excellent quality. September to November.
- MAIDEN'S BLUSH**—Large attractive red blushed apple of fair quality. Heavy bearer. September.
- MAMMOTH BLACK TWIG**—Large deep red late keeping winter apple of good quality. December to May.
- MILTON**—A very handsome new apple of the McIntosh type. Fruit a beautiful pinkish red with tender, crisp, white flesh of excellent flavor. Trees hardy and vigorous. Ripens a month ahead of McIntosh.
- POUND SWEET (Pumpkin Sweet)**—Large yellow russeted apple. Very sweet. October and November.
- RED GRAVENSTEIN**—A new red sport, much more attractive than its parent. Differs from the old Gravenstein only in the solid dark red color of the fruit. Should be planted in place of Gravenstein.
- WEALTHY**—Beautiful, brilliant red apple of fine quality. Exceptionally hardy and an early bearer. Excellent filler. October to January.
- WOLF RIVER**—Very large, yellow striped with bright crimson. September to December.

WINTER VARIETIES

- BALDWIN**—Large, bright red. Trees vigorous and productive. A leading commercial sort in New York and New England. November to May.
- BEN DAVIS**—Large, bright red, fair quality. Excellent keeper. January to June.

We Give a Special 10 Per Cent Discount for Early Orders

If we can persuade our customers to order early, we can get all the work preliminary to shipping done before the shipping season arrives. This saves us the big expense of costly inexperienced help during the rush season. To persuade our customers to order early we allow a **Special 10 Per Cent Discount on All Orders Received by Feb. 25th, 1937, Provided Full Cash is Received With Order.**

OUR SOIL PRODUCES THE BEST

CORTLAND—A comparatively new apple of the McIntosh type that combines the high quality and flavor of the McIntosh, the ability to stand handling of the Baldwin and ability to hang to the tree of the Ben Davis. Should be planted extensively. An excellent variety to plant with McIntosh as a cross pollinator. November to February.

DELICIOUS—A large dark red apple with crisp, fine grained flesh of excellent quality and flavor. Hardy, vigorous and an annual bearer. December to February.

GANO (Black Ben Davis)—Large, dark red. January to June.

GALLIA BEAUTY—A new red sport identical with Rome Beauty except that fruit is solid red in color instead of striped.

GOLDEN RUSSET—Attractive yellow russeted apple. Long keeper. November to April.

GRIMES GOLDEN—Large golden yellow. Good quality. December to April.

HUBBARDSTON—Yellow and red striped. Early bearer. November to March.

JONATHAN—Beautiful red apple of excellent quality. Productive and an early bearer. November to April.

KING—Large attractive red apple. November to March.

McINTOSH RED—A very attractive red apple of the highest quality. Hardy, bears young and annually. A leading, profitable, commercial sort for New York and New England. Productive. October.

NORTHERN SPY—Large red and yellow apple of fine quality. Leading commercial sort. November to April.

McIntosh Red Apple

COMPLETE SATISFACTION GUARANTEED

Cortland Apple

NORTHWESTERN GREENING—Large, yellowish-green apple. Vigorous and hardy. October to March.

OLD WINESAP—Medium size dark red apple of good quality. Bears early, abundantly and regularly. December.

OPALESCENT—Very handsome dark crimson apple. December to March.

RHODE ISLAND GREENING—Large yellowish-green apple of fine quality. An abundant yielder and excellent keeper. One of the leading commercial sorts. November to March.

RED SPY—A new red sport identical with Northern Spy except that the fruit is a solid bright red. Much handsomer than its parent. An excellent commercial sort.

RAMBO—Red and yellow. Hardy and productive. October to December.

ROME BEAUTY—Yellow and red striped apple of excellent quality. Prolific annual bearer. Profitable commercial sort for New York, Ohio, Pa., and W. Va. December to May.

RED ROME—Another new red sport of Rome Beauty and like Gallia Beauty is identical with its parent in all characteristics except fruit is a solid red in color.

ROXBURY RUSSET—Yellow, russeted apple of excellent quality. December to June.

DOUBLE RED DELICIOUS—A solid red strain of the regular Delicious.

YELLOW DELICIOUS—A bright golden yellow apple of excellent quality. Splendid keeper.

- SMOKEHOUSE**—Yellow, mottled with dark red. October to March.
- SPITZENBURG**—High flavored, dark red. November to April.
- STARK**—Large, red and yellow striped. January to May.
- STAYMAN’S WINESAP**—Yellow striped with red. Excellent quality. Productive and an early bearer. December to March.
- TOLMAN SWEET**—Yellow tinged with red. Very sweet. Hardy and productive. November to April.
- TWENTY OUNCE**—Very large, red and yellow striped. October to January.
- WAGENER**—A bright light red apple of excellent quality. Very productive. October to January.
- WINTER BANANA**—Beautiful pale yellow apple with bright pinkish blush. Excellent quality. Prolific and an early bearer. November to March.
- YORK IMPERIAL**—Yellow striped with light red. Quality very good. December to February.

Crab Apples

- HYSLOP**—Large, brilliant dark red. Hardy, reliable cropper. September and October.
- TRANSCENDENT**—Bright yellow with bright red cheek. Productive. August and September.

Dwarf Apple Trees

Dwarf Apple trees bear early, take up little room and the fruit is easily picked.

We offer the following varieties:
Duchess of Oldenburg, Golden Sweet, Red Astrachan, Rome Beauty, Wealthy, Winter Banana, Yellow Transparent.

2 year	3 to 4 ft.	1/2 to 5/8	.60	4.00	30.00

Visit Our Nurseries and Select Your Own Trees

Peach Trees

We have always been large growers of extra fine Peach trees and this year we have one of the largest and finest blocks of Peaches we have ever grown. Our trees can absolutely be depended upon to produce fruit of the variety for which they are sold. All buds used in propagating originated from bearing trees and the buds were cut while the fruit was still on the trees. Careful supervision has kept our Peach blocks free from any possible mixture of varieties.

Prices of Peach Trees

				Each	Ten	Hundred
1 year	4	to 5	ft. 9/16 and up	\$.55	\$4.00	\$30.00
1 year	3	to 4	ft. 7/16 to 9/16	.50	3.00	20.00
1 year	2½	to 3	ft. 5/16 to 7/16	.45	2.50	15.00
1 year	2	to 2½	ft.	.40	2.00	10.00

BELLE OF GEORGIA—Large, attractive white fleshed peach. Red cheek. Hardy and productive. Freestone. Middle of September.

CARMAN—Large, white fleshed peach of fine quality. Very hardy and productive. Freestone. Early September.

CHAIRS CHOICE—Deep yellow with red cheek. Freestone. Last September.

CHAMPION—Large creamy white with red cheek. Excellent quality. Good shipper. Hardy and productive. Freestone. Middle September.

CRAWFORD'S EARLY—Large yellow peach of the finest quality and flavor. Freestone. Middle of September.

CRAWFORD'S LATE—One of the finest late varieties. Large, yellow, of excellent quality. Freestone. Early October.

ELBERTA—The greatest commercial variety on the market. Will thrive where any peach can be grown. A uniform cropper. Large, yellow with red cheek, juicy and excellent quality. Freestone. Last of September.

Elberta Peach

CERTIFIED FREE FROM DISEASE

J. H. Hale Peach

EARLY ELBERTA—An excellent new variety resembling Elberta very closely, except a little rounder in shape and about ten days earlier in ripening. Freestone. Middle September.

FITZGERALD—Very hardy. Large, brilliant yellow with red cheek. Early bearer. Freestone. Middle September.

GREENSBORO—Large, bright red over yellow, flesh white. Good quality. Freestone. Late August.

J. H. HALE—An extra large peach, yellow overlaid with crimson. Flesh golden yellow, of delicious flavor. An excellent shipper. A fine commercial variety. Prolific when cross pollenized with some other variety. All of the varieties offered in this catalog are suitable for planting with Hale. Freestone. Last of September.

GOLDEN JUBILEE—A new early yellow freestone peach of excellent quality. Early September.

HILEY BELLE—Large white peach with bright red cheek. Rich and juicy. Excellent shipper. Freestone. Middle of September.

NIAGARA—Large yellow peach of Early Crawford type. Juicy and tender—very good in quality. Late September.

RAY—An attractive white peach with red blush. Excellent quality and a good shipper. Freestone. Last of September.

Pine Plains, N. Y., May 8, 1936.

Gentlemen: The trees and shrubs ordered from you came through in fine condition. They were promptly planted, and all have started nicely. Many thanks for such nice trees.

Yours sincerely, Fred Knickerbocker.

GROWN BY EXPERIENCED MEN

- ROCHESTER**—A comparatively new extra early peach of the highest quality and most delicious flavor. Large yellow, with attractive red blush. A very fine canner, prolific and an early bearer. Freestone. Early September.
- SALBERTA**—Large Elberta type, late peach of good quality. Freestone. September.
- SALWAY**—Large, deep yellow, red cheek. Freestone. Middle October.
- SMOCK (Beer’s Smock)**—An excellent late peach. Yellow. Good quality. Freestone. Middle of October.
- SOUTH HAVEN**—Another excellent new peach well worth planting. Golden yellow with red blush. Large, meaty and of delicious flavor. Prolific. Freestone. Early September.
- WILMA**—An offspring of Elberta ripening 10 days later. Large, freestone—good quality.
- YELLOW ST. JOHN**—Medium size. Orange yellow with red blush. Freestone. Early September.

New Peaches

We can furnish in limited quantities the following new varieties of Peaches:

- MIKADO**—Very early, yellow, semi-cling, good quality. Early August.
- MARIGOLD**—Early yellow, excellent quality, semi-cling.
- VALIANT**—Large, yellow, freestone, juicy, very good quality. Productive. Early September.
- VETERAN**—Large, round, yellow, freestone. Excellent quality. Early September.

DIAMOND (White)—The leading early white grape. Excellent quality.

MOORE'S EARLY (Black)—Berries and bunches large. Black with blue bloom. Fine quality. Early.

NIAGARA (White)—The most popular white grape. Bunches and berries extra large. Vigorous, productive and a good keeper. Midseason.

WORDEN (Black)—A large early black grape of fine quality. Berries and bunches large.

Hannon, Ont. Can., February 22, 1936.

Gentlemen: We have bought fruit trees from your nursery on two previous years. They have done exceptionally well. A few of the trees had apples on last year, two years after planting. All have made splendid growth and are we well pleased with them.

Yours truly, Garfield Berry.

ASK ANY OF KELLY'S CUSTOMERS

Raspberries

Prices—All Varieties Except Newburg:
\$1.35 per 25, \$3.50 per 100, \$25.00 per 1000

CHIEF (Red)—The finest early red raspberry for general planting. Large, firm and a very heavy yielder. Ripens 10 days before Latham.

CUTHBERT (Red)—Large, crimson, hardy and prolific. Fine for market or garden. Excellent quality. Midseason.

CUMBERLAND (Black)—Large, glossy black, firm, of excellent quality. Hardy and productive. Early to midseason.

COLUMBIAN (Purple)—A fine commercial sort. Vigorous, very productive, excellent canner. Fruit large, purple, firm. Midseason.

LATHAM (Red)—Large, round, firm, brilliant red. Most profitable commercial variety. Hardy, very prolific, an excellent shipper and a perfect variety for canning. Early. Ripens evenly over a very long season.

NEWBURG (Red)—A new variety of excellent color and quality. Very large and firm. Fine keeper and shipper. Vigorous, hardy and very productive. Three or four days earlier than Cuthbert. Prices—\$1.50 per 25, \$4.00 per 100, \$30.00 per 1000.

PLUM FARMER (Black)—One of the best commercial sorts. Berries large, thick meated, firm. Very productive. Early midseason.

ST. REGIS (Everbearing)—A bright crimson berry of excellent quality. Fruit commences to ripen with the earliest and continues to ripen on young canes until October.

Freeport, N. Y., October 10, 1936.

Gentlemen: I wish to praise you about the trees that I bought from you last year. They are the finest trees that I have ever seen, and I feel proud of them. If any people from Long Island inquire about your trees, give them my address and they can come and see for themselves.

Yours truly, G. Krimsier.

Latham Raspberries

ORCHARDS OF KELLY TREES EVERYWHERE

Blackberries

Prices \$1.50 per 25, \$4.50 per 100, \$30.00 per 1000.

BLOWERS—Large glossy jet black, firm and delicious. Very hardy and enormously productive. Long ripening season.

ELDORADO—Very large, jet black. Sweet and delicious with no hard core. Very hardy and vigorous.

Asparagus

Prices—Extra Strong, 2 year,
60c per 25, \$1.75 per 100, \$10.00 per 1000.

CONOVERS COLOSSAL—A large size standard variety of excellent quality.

PALMETTO—Very early, even-growing, of good quality.

WASHINGTON—By far the best variety. Large size, rapid growing, very productive, rust resistant.

Currants

WILDER—An unsurpassed commercial sort. Bunches and berries very large, bright attractive red. Hang on bushes well and of excellent quality. Productive. Prices—Extra Strong, 1 year bushes, \$2.50 per 10, \$15.00 per 100.

Strawberries

The following two recent introductions of the U. S. Department of Agriculture are considered by most strawberry growers as superior to other standard varieties both for home and commercial use.

Prices—25 plants 50c, 50 plants 75c, 100 plants \$1.00,
500 plants \$4.50, 1000 plants \$8.00.

DORSET—An extra early self pollenizing offspring of Premier. Plants are large and healthy, withstanding drought, excessive rains and frost better than any other standard variety. Does well on poor soil. Berries large, evenly matured, light bright red. Excellent for market or home use.

FAIRFAX—Another excellent new variety ripening early, about same time as Premier. Very vigorous and a fine plant maker. Withstands adverse conditions well and ripens evenly over a long period of ripening. Berries large and very attractive. Every strawberry grower should set Dorset and Fairfax.

PREMIER—An early, productive variety of unsurpassed quality. Vigorous and healthy.

Strawberry Plants Cannot Be Shipped By Freight.

COMPLETE SATISFACTION GUARANTEED

Flowering Shrubs

Prices (except as noted)—Strong Two Year Bushes,
2½ to 3 ft., 30c each, \$2.50 per 10

ALTHEAS, DOUBLE—Bloom freely from midsummer until frost. We offer double flowering varieties in Purple, Red, White and Pink.

BEAUTY BUSH—Beautiful bell shaped pale pink flowers during June in great profusion.

BUTTERFLY BUSH—Beautiful lilac covered flowers from June to frost.

DEUTZIA, DOUBLE FLOWERING—Double white flowers tinged with rose.

DEUTZIA, GRACILIS—Dwarf growing. White flowers in June. 18 to 24 in.

DEUTZIA, PRIDE OF ROCHESTER—Double white flowers tinged with rose in May.

FORSYTHIA FORTUNEII—Yellow flowers in April. A drooping form more upright than Suspensa with heavier darker foliage.

FORSYTHIA INTERMEDIA—Large beautiful golden yellow flowers in great profusion in April. Semi-upright.

FORSYTHIA SUSPENSА—A full drooping type with golden yellow flowers in April.

FORSYTHIA VIRIDISSIMA—An upright grower with beautiful yellow flowers in April before the leaves appear.

HONEYSUCKLE (White Belle)—Very hardy. An upright, strong grower. White blossoms. Red berries.

HONEYSUCKLE, MANCHURIAN—White tinted flowers in May and June. Red and yellow fruit.

HONEYSUCKLE, WHITE TARTARIAN—Hardy, vigorous shrub with white flowers and red berries.

HYDRANGEA ARBORESCENS (Everblooming Snowball Hydrangea)—Beautiful ball shaped clusters of pure white flowers from July to Sept. 2½ to 3 ft.

HYDRANGEA P. G.—Immense cone shaped clusters of pink and white flowers turning to bronze in autumn.

HYDRANGEA, TREE FORM—The Hydrangea P. G. grown in tree form with a single stem. 4 to 5 ft., 60c each.
